

# Mounting options

## Type 1.

The power supply in the canopy.

This version is suitable for interiors where the driver can not be located outside the fixture or mounted under the ceiling surface. The canopy is available in the solid wood version (the same kind as the body interior wood), white or varnished in the color of the lamp. LED driver is included.

## TYPE 2.

The power supply located externally.

Leather belts are hung on 2 holders attached to the ceiling, and the power supply is placed anywhere outside the lamp, for instance mounted under the ceiling surface, up to 10 m from the lamp. Belt holders are available in the solid wood version (the same kind as the body interior wood), white or varnished in the color of the lamp.
